## Thursday, February 6th, 2025

09:00 -09:30 Reception and Opening remarks

**09:30 - 10:30 KEYNOTE LECTURE 1 Mari Sepp (Heidelberg, Germany)**

*"Tracing cerebellum development and evolution with single-cell genomics"*

*Chairman : Fekrije Selimi*

10:30 - 10:45 Coffee break

**10:45 - 12:00 Session 1 "Neuro-bioimaging"** *(10-min talk + 5-min questions)* *Chairman : Ludovic Galas*

10:45 - 11:00 **Jan Giesebrecht** *(Product Applications Specialists, Thermo Fisher Scientific)* Brain Visualization and Analysis with Amira Software

11:00 - 11:15 **Clément Laigle** *(Advanced Workflow Specialist EMEA, Confocal Microscopy Life Sciences, Leica Microsystèmes SAS)* DIVE, FLIM and STED imaging

11:15 - 11:30 **Sercan Deniz** *(Senior Sales Manager, 3Brain AG)* Explore the Future of Neuroscience Research with 3Brain Technologies

11:30 - 11:45 **Sabine Jourdain** *(Sales Manager Life Science & Applied Markets France, Bruker)* Principles and Applications of MALDI Mass Spectrometry Imaging

11:45 - 12:00 **Christian Feuillet** *(Instrument Sales Specialist Imaging, Myltenyi Biotec SAS)* Revealing cerebellum in 3D through light sheet microscopy

12:00 - 13:30 Lunch

**13:30 - 14:50 Session 2 “Innovative models and approaches”** *(12-min talk+8-min questions)* *Chairman : Michael Graupner*

13:30 - 13:50 **Valentina Cerrato** (Turino, Italy) A single cell atlas to unveil the diversity of mouse cerebellar astrocytes: insights into their molecular identities, development, and functions

13:50 - 14:10 **François Blot** (Paris, France) "Optogenetic control of Purkinje cell subtypes, from 1-photon wide-field head fixed to 2-photon holographic photostimulation in freely moving mice"

14:10 - 14:30 **Benjamin Lepennetier** (Paris, France) "Establishment of an organoid model to decrypt the impact of defective PRDM13 function in cerebellar development"

14:30 - 14:50 **Camille Racine** (Rouen, France) "A new look at cerebellar angiogenesis: innovations and first data"

**14:50 - 15:30 Flash poster presentation 2 (1 slice - 1 min)**

15:30 - 16:00 Coffee break

**16:00 - 18:30 Poster session and workshops (mandatory registration!)**

**18:30 - 21:00 Social event**

## Friday, February 7th, 2025

09:00 -09:15 Reception

**09:15-11:40 Session 3 "From Cellular to Physiological Considerations"** *(12-min talk+8-min questions)* *Chairman : Fabrice Ango*

**09:15 - 09:35** **Beetsi Urrieta** (Paris, France) "Excitability in the granule cell lineage coordinates input differentiation and synapse maturation in the cerebellar cortex"

**09:35 - 09:55** **Artem Gornov** (Lund, Sweden) "Classical conditioning of a Purkinje cell in vitro"

**09:55 - 10:15** **Sambre Mach** (Paris, France) "Local sources of monoamines in the cerebellar cortex"

**10:15 - 10:35** **Romain Sala** (Paris, France) "Cerebellar contribution to offline memory consolidation"

10:35-11:00 Coffee break

**11:00 - 11:20** **Martina Bracco** (Paris, France) "Emergence of Pre-movement Beta Activity with Sensorimotor Predictions and Error Corrections"

**11:20 - 11:40** **Xhensjana Zenelaj** (Paris, France) "A disynaptic pathway linking the cerebellum to the hippocampus"

**11:40 - 12:30 Club Committee**

12:30 - 13:45 Lunch

**13:45 - 14:45 Session 4 "Pathological Considerations"** *(12-min talk+8-min questions)* *Chairman : Cécile Galléa*

**13:45 - 14:05** **Aline Haetty** (Montpellier, France) "Deep cerebellar nuclei circuitry in Amyotrophic Lateral Sclerosis (ALS)"

**14:05 - 14:25** **Parvathi Satheesh** (Plzen, Czech Republic) "Primary cilia deficiency in the mouse model of spinocerebellar ataxia type 1"

**14:25 - 14:45** **Lydie Burglen** (Paris, France) "A journey from the patient to fundamental research on cerebellar development and function: how can we reach each other through the identification of genes responsible for congenital cerebellar disorders (and not only)?"

**14:45-15:45 KEYNOTE LECTURE 2 Christian Hansel (Chicago, USA)**
*"Instructive cerebellar signals guide neocortical plasticity"*

*Chairman : Philippe Isope*

15:45-16:00 Closing remarks
